Skills Acquired:

EconXLab Workshop on Methods and Software

Handling in Economic and Allied Analysis @ Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria.

A Synopsis on Methods and Software

This workshop taught me how to exploit recent single equation regression methods, such as Asymmetric Engle-Granger, otherwise known as hidden cointegration , Asymmetric ARDL and volatility estimations. Further, I understood the concept of multi-equation analysis, using structural modeling and forecast analysis. All these econometric techniques were taught using EVIEW econometric software.

5. March 16th -20th , 2015

Workshop Theme:

Skills Acquired:

Centre for Econometrics and Allied Research

(CEAR) University of Ibadan, Nigeria

Module 1: Single Equation Econometric Models

At the end of this module, I understood the differences between linear and non-linear regression models. Further, I learnt practical ways of estimating linear and nonlinear regression models using STATA econometrics software. In addition, I learnt practical qualitative regression models such as Logit and Probit. Finally, I was exposed to article writing using these models taught above in real economic data as well as how to critique articles, especially in the areas of research modeling, techniques and interpretations.

6. December 4th -5th, 2014
